

Technical Meeting of AlpCheck 2 Joint Session – TRANSITECTS & AlpCheck 2

The AlpCheck 2 Meeting started on the 13 July 2010 at FAO Headquarters in Rome, including a Joint Session with the TRANSITECTS Project introduced by the Mountain Partnership Secretariat's Coordinator, Mr. Douglas McGuire

The Technical Meeting of the AlpCheck 2 Project's Partners was held on 13 and 14 of July 2010, at FAO Headquarters and at the EURAC Representing Office in Rome. Main organizers were the Italian Ministry for the Environment and the Mountain Partnership Secretariat (FAO), which also benefitted of the support from other relevant institutions and companies, in particular the Veneto Region.

Partners involved in this project related to the European Programme Alpine Space came from several countries of the Alpine arch, such as Italy, Austria, Germany, France, Slovenia, to take part in this two day meeting. The Technical Meeting focused mainly on activities currently on schedule under the Technical Work Packages, focusing on their interlink ages. In particular the main topics of the discussion were: the definition of the Core Network for modelling the road transport system of the whole Alpine area, the structure of the Data Model and the integration of data sources into AlpCheck2 information system. On 12 and 13 July, also the Technical Meeting of another European Project was held in FAO, TRANSITECTS. TRANSITECTS Project also aims to improve sustainability of transport within the Alpine area and it is being co-financed as AlpCheck 2 in the framework of the Alpine Space Programme.

To coincide with the two projects meetings, a Joint Session involving all the participants from AlpCheck 2 and TRANSITECTS as well as further institutional representatives from the Italian Ministry of Transport and UNEP, was organized on 13 July in FAO. The Coordinator of the Mountain Partnership Secretariat, Mr. Douglas McGuire introduced the Joint Session with a speech regarding "Sustainable Mobility in Mountain Areas".

Mr. McGuire stressed the importance of multilateral projects focusing on mountain areas through different perspectives, such as AlpCheck 2 and TRANSITECTS are doing in the Alps. Projects or experiences focusing on transportation related to mountain environment are welcomed by the Mountain Partnership Secretariat, which may facilitate exchanges and contribute to widening it from a European to a global scope.

Mr. McGuire also spoke about the SWOMM Side Event at the CSD18 (Commission on Sustainable Development) at the UN Headquarters in New York last May, describing it a successful experience of dissemination of the outcomes of research and activities carried out within the Alpine Space. The Side Event arose within the framework of the existing cooperation between the Italian Ministry for the Environment and the Mountain Partnership Secretariat.

After Mr. McGuire's presentation, the partners from the two projects and other experts carried on working jointly in the Ethiopia Room, discussing common synergies and engaging in the preparation of the upcoming TRANSITECS WP7 cross-fertilization workshop and other possible initiatives.
